

## **Semester - II**

### **Course Objective**

The Constitution of India defines the basic objectives and functioning of the government. It has provisions for bringing about social change and defining the relationship between individual citizen and the state. It lays out certain ideals that form the basis of the kind of country that we as a citizen aspire to live in. An in-depth analysis of various basic areas of constitution is the main objective of this inter disciplinary course. This helps the students to strengthen their understanding of Indian constitution and functioning of government. Globalization is the cluster of technological, economic, and political innovations that have drastically reduced the barriers to economic, political and cultural exchange. The process of globalization involves the trans nationalization of production and capital, which gives rise to global trade. It is obvious that nation-states still exist and constantly interact with global financial and trade organizations. This course investigates how globalization has influenced public policy and draws on theories from economics and political science to elucidate the causes and consequences of globalization.

#### 1. Understanding Governance: Constitutional Context, Institutions

(PPCC-201)                      Core Course 4 credit
